

Cloud & Software Engineer with 5.5+ years of experience in Azure Cloud, DevOps, and Web Application Development. Specialized in Azure App Service and Web Apps for Containers, with proven expertise in managing and maintaining hundreds of production-grade app services, ensuring high availability, security, and cost optimization. Skilled in leading projects from designing to development and deploying containerized applications with Docker and automating deployments using GitHub Actions and CI/CD pipelines. Adept at mentoring teams, troubleshooting critical issues, and driving operational excellence in cloud environments. Seeking to contribute expertise as a Cloud Engineer or Azure Developer.

CLOUD & DEVOPS: Azure (App Service, Blob Storage), Docker, GitHub Actions, CI/CD Pipelines, Terraform

PROGRAMMING & FRAMEWORKS: Python, Django, Django REST Framework (DRF), Flask

DATABASES: PostgreSQL, MySQL

TOOLS & PLATFORMS: Linux, Postman, Git, Docker Desktop, Kubernetes, GitHub, Excel, Power BI, REST APIs

OTHER SKILLS: Microservices, Scalable Architecture, Debugging & Troubleshooting, Team Mentorship & Training

WORK EXPERIENCE:

SME & Trainer - LTIMindtree, Pune

June '24–June '25

- Acted as Subject Matter Expert (SME) and trained 30+ team members on Docker, CI/CD, GitHub, and Azure App Services, leading to a 50% improvement in team performance through effective training and knowledge sharing.
- Managed and maintained 100+ Azure App Services (Web Apps & Web Apps for Containers), ensuring 99.9% uptime, security compliance, and cost optimization.
- Automated deployments using GitHub Actions pipelines, significantly reducing manual intervention and errors.
- Assisted multiple teams in debugging and resolving complex architectural design issues in internal Microsoft apps hosted on Azure.
- Assisted Microsoft project teams in debugging and optimizing Python Django-based applications hosted on Azure App Service.

Senior Software Engineer - LTIMindtree, Pune

June '23–June '24

- Led deployment and lifecycle management of hundreds of web applications on Azure App Service, ensuring scalability, monitoring, and disaster recovery readiness.
- Optimized app service configurations (scaling, staging slots, connection settings, environment variables, basic auth) to improve performance by 20% and reduce costs by 15%.
- Designed containerized Flask microservices using Docker and deployed them seamlessly on Azure Web Apps for Containers.
- Implemented end-to-end CI/CD pipelines with GitHub Actions, accelerating release cycles from weeks to days.
- Worked with Azure Blob Storage, PostgreSQL, and App Service integrations for secure, scalable cloud-native applications.
- Enhanced application availability & reliability by implementing cloud-based monitoring and alerting mechanisms.

Python Developer - Sna Sistec Pvt. Ltd, Bhopal

Jan '20–Jun '23

- Developed and deployed REST APIs using Django REST Framework (DRF), integrating with cloud-hosted applications.
- Improved application stability by building monitoring dashboards and health checks for deployed APIs.
- Supported CI/CD pipelines implementation for Python applications, enhancing delivery speed by 15%.

INTERNSHIPS / TRAINING:

Intern - Hewlett Packard Enterprise (HP), Bhopal

June 2018

- Contributed to the development of a student information portal using the Django web framework and MySQL database as part of a backend project.

Intern - ITDP Training & Consultancy, Bhopal

July 2017

- Completed a 2-month training program in web technologies covering HTML, CSS, JavaScript, PHP, and Bootstrap.

CERTIFICATES:

- Microsoft Azure Fundamentals
- LTIMindtree Generative AI
- Google Advanced Analytics

AZURE CLOUD & DEVOPS EXPERIENCE:

- Azure App Services Management: Administered and maintained 100+ production-grade App Services (Web Apps & Web Apps for Containers), ensuring uptime, load balancing, scaling, and cost optimization.
- Container Deployments: Deployed Dockerized applications on Azure Web Apps with automated build and release pipelines.
- CI/CD Pipelines: Implemented GitHub Actions workflows for automated deployments to Azure, reducing deployment time by 70%.
- Monitoring & Troubleshooting: Configured Application Insights, Log Analytics, and diagnostic logging for proactive monitoring, debugging, and performance tuning.
- Security & Compliance: Applied Azure Role-Based Access Control (RBAC), Key Vault, Vnet, managed identity, private endpoint, and network restrictions for compliance and secure deployments.
- Infrastructure as Code (IaC): Used Terraform to provision and manage Azure resources, enabling reproducible environments across dev, QA, and production.

EDUCATION

Bachelor of Engineering – Computer Science, 2019

Sagar Institute of Research and Technology, RGPV University, Bhopal
